

# Lu Lu

484 393 5858 ♦ lu.lu.1@brown.edu

Division of Applied Mathematics, Brown University ♦ Providence, RI 02912

## EDUCATION

### Brown University

8/2014–present

Expected 12/2019

- Ph.D. in Applied Mathematics
- M.Sc. in Computer Science
- M.Sc. in Applied Mathematics
- M.Sc. in Fluids and Thermal Sciences
- GPA 3.94/4.00

### Tsinghua University, Beijing, China

8/2009–7/2013

- B.Eng. in Thermal Engineering
- B.Ec. in Economics
- Minor in Computer Science
- GPA 92.2/100, Rank 1/87; Major GPA 93.8/100; 101 courses, 281 credits

## RESEARCH EXPERIENCE

### George Em Karniadakis' Group, Division of Applied Mathematics, Brown University

9/2014–present

- **Project:** Machine learning
  - Demonstrated numerically and theoretically that deep and narrow neural networks will converge to erroneous mean or median states of the target function depending on the loss with high probability.
  - Quantified the generalization error of neural networks for classification problems in terms of data distribution and neural network smoothness.
  - Quantified total uncertainty in physics-informed neural networks (PINNs) for solving forward and inverse stochastic problems.
  - Extended PINNs to fractional PINNs (fPINNs) to solve space-time fractional advection-diffusion equations, and demonstrated their accuracy and effectiveness in solving multi-dimensional forward and inverse problems with forcing terms whose values are only known at randomly scattered spatio-temporal coordinates.
- **Project:** Computational biomechanics
  - Developed a coarse-grained patchy particle model of sickle hemoglobin (HbS) to probe the formation process, mechanical and structural properties of HbS polymer fiber.
  - Developed a hybrid HbS fiber model by applying mesoscopic adaptive resolution scheme (MARS) which seamlessly couples the microscopic and mesoscopic HbS fiber models toward understanding of interactions between HbS fibers.
  - Developed coarse-grained models to simulate the dynamic self-assembly of two types of amyloids (amylin and amyloid  $\beta$ ) to gain a quantitative understanding of the molecular mechanisms causing different aggregated structures and biomechanical properties of amyloid fibrils.
  - Simulated the dynamics of healthy and diseased red blood cells (RBCs) traversing the interendothelial slit in the human spleen using a two-component protein-scale RBC model, which reveals that the spleen not only senses and clears RBCs with abnormal shapes and deformability but also alters the geometries of RBCs that contain protein defects arising from hereditary blood disorders.
- **Project:** Software development
  - Developed DeepXDE, a deep learning library for solving differential equations on top of TensorFlow. (<https://github.com/lululxvi/deepxde>)
  - Developed OpenRBC (a fast simulator of RBCs at protein resolution) using an adaptive spatial searching algorithm based on Voronoi tessellation and  $k$ -d tree data structure, which is capable to simulate an entire RBC lipid bilayer and cytoskeleton modeled by 4 million mesoscopic particles on a single SuperVessel 4-core instance. (<https://devpost.com/software/openrbc>, <https://github.com/yhtang/OpenRBC>)

## PUBLICATIONS (\*CONTRIBUTED EQUALLY)

## Preprints

1. Lu, L., Meng, X., Mao, Z., & Karniadakis, G. E. (2019). DeepXDE: A Deep Learning Library for Solving Differential Equations. *arXiv preprint arXiv:1907.04502*.
2. Jin, P., Lu, L., Tang, Y., & Karniadakis, G. E. (2019). Quantifying the Generalization Error in Deep Learning in terms of Data Distribution and Neural Network Smoothness. *arXiv preprint arXiv:1905.11427*.
3. Lu, L., Shin, Y., Su, Y., & Karniadakis, G. E. (2019). Dying ReLU and Initialization: Theory and Numerical Examples. *arXiv preprint arXiv:1903.06733*.
4. Pang, G., Lu, L., & Karniadakis, G. E. (2018). fPINNs: Fractional Physics-Informed Neural Networks. *arXiv preprint arXiv:1811.08967*.
5. Zhang, D., Lu, L., Guo, L., & Karniadakis, G. E. (2018). Quantifying Total Uncertainty in Physics-informed Neural Networks for Solving Forward and Inverse Stochastic Problems. *arXiv preprint arXiv:1809.08327*.

## TALKS AND PRESENTATIONS

### Invited Talks

1. Collapse of Deep and Narrow Neural Nets. *ICERM Scientific Machine Learning*, Providence, RI, Jan. 2019.

### Conference Presentations

1. Quantitative Prediction of Erythrocyte Sickling for Anti-polymerization Activities in Sick Cell Disease. *60<sup>th</sup> Annual Red Cell Meeting*, New Haven, CT, Oct. 2018. (Poster Presentation)
2. OpenRBC: A Fast Simulator of Red Blood Cells at Protein Resolution. *SIAM Annual Meeting*, Pittsburgh, PA, Jul. 2017. (Oral Presentation)
3. Probing the Twisted Structure of Sick Hemoglobin Fibers via Particle Simulations. *20<sup>th</sup> Biennial Hemoglobin Switching Conference*, Pacific Grove, CA, Sept. 2016. (Poster Presentation)
4. Shock Tube Ignition Delay Time Study of RP-1/Oxygen/Argon Mixtures. *Stanford Undergraduate Visiting Research Symposium*, Stanford, CA, Aug. 2012. (Oral and Poster Presentation)
5. The Feasibility Analysis of Small-sized Commercial Ice-storage Air-conditioning System. *10<sup>th</sup> National Symposium on Refrigerators, Air Conditioners and Compressors*, Qingdao, Shandong, Aug. 2011. (Oral Presentation)

## AWARDS AND HONORS

- Associate Member, Sigma Xi, 2018.
- George Irving Hopkins Fellowship, Brown University, 2017.
- [Open Graduate Education Program](#), Brown University, 2017.
- Third Prize, [IBM OpenPower Developer Challenge contest](#), 2016.
- Fellowship for graduate students, Brown University, 2015.
- Provincial Outstanding Graduates, Beijing, China, 2013. (top 5% of graduating students)
- Provincial Merit Student, Beijing, China, 2013. (top 1 student in every department)
- Outstanding Graduates, Tsinghua University, 2013. (top 2% of graduating students)
- Outstanding Undergraduate Graduation Thesis, Tsinghua University, 2013. (top 5% of graduating students)
- Excellent Student Cadre, Tsinghua University, 2013.
- Jiang Nanxiang Scholarship, Tsinghua University, 2012. (top 1 student in every department)
- Summer Research Scholarship, [Chinese Undergraduate Visiting Research Program](#), Stanford University, 2012.
- Outstanding Volunteer, Tsinghua University learning center, 2012.
- Member of "[Spark](#)" [Innovative Talent Cultivation Program](#), Tsinghua University, 2011. (top 36 of 3300 students)
- Tsinghua Friend–Kai Feng Fellowship, Tsinghua University, 2011. (top 10 students in every grade)
- Best Paper Award, 10<sup>th</sup> National Symposium on Refrigerators, Air Conditioners and Compressors, Shandong, China, 2011.
- Third Prize, 29<sup>th</sup> "Challenge Cup" Tsinghua University Students' Extracurricular Academic Science and Technology Works Contest, 2011.
- Three-star Volunteer, Tsinghua University, 2011. (entitled to those who devoted more than 100 hours to voluntary work)
- Tsinghua Friend–Kai Feng Fellowship, Tsinghua University, 2010. (top 10 students in every grade)
- First Prize, 27<sup>th</sup> Annual National Physics Contest for College Students, Beijing, China, 2010.
- Second Prize, 4<sup>th</sup> Intelligent Car Competition, Tsinghua University, 2010.
- First Prize, Chinese Physics Olympiad, Jiangsu, China, 2008.
- First Prize, Chinese Mathematical Olympiad, Jiangsu, China, 2008.
- Third Prize, Chinese Chemistry Olympiad, Jiangsu, China, 2008.
- Second Prize, Chinese Physics Olympiad, Jiangsu, China, 2007.

## PROFESSIONAL SERVICES

- Reviewer, Journal of Computational Physics, Journal of Eye Study and Treatment, International Journal of Blood Research and Disorders

## TEACHING EXPERIENCE

- Teaching Assistant, Numerical Solution of Partial Differential Equations I 9/2018–12/2018
- Teaching Assistant, Operations Research: Probability Models 1/2018–5/2018
- Teaching Assistant, Computational Probability and Statistics 9/2017–12/2017
- Teaching Assistant, Advanced Fluid Mechanics 1/2015–5/2015
- Instructor, Tsinghua University National Students' Innovation Camp (instructed 24 senior high school students to complete 8 innovation projects in one week) 8/2011
- Instructor, Tsinghua University learning center (taught freshmen mathematics and physics) 3/2010–12/2011

## ACADEMIC ACTIVITIES

- **Leader** of the Tsinghua–Toshiba Innovation Development Interest Group (managed 60 students and 10 research projects on city construction and energy conservation) 6/2012–3/2013
- **President** of the Association of Students for Science and Technology, Tsinghua University (organized the science contest on energy saving and emission reduction, which 40 groups participated in) 12/2011–2/2013
- **Representative** of Tsinghua University, 6<sup>th</sup> Freescale Cup National University Students Intelligent Car Race, Shanxi, China 8/2011
- **Team leader** of an in-field study on power generating and environment protection, Daihai Power Plant, Inner Mongolia, China 8/2010
- **Volunteer** of the 33<sup>rd</sup> International Symposium on Combustion, Beijing, China 8/2010

## SKILLS

<b>Softwares</b>	LAMMPS, VMD; OpenFOAM, Gambit, Fluent, Chemkin; AutoCAD, SolidWorks; $\LaTeX$ .
<b>Programming</b>	C/C++, Python, MATLAB, Fortran, Java, SQL, x86/x86-64 Assembly; TensorFlow, OpenMP, MPI.
<b>Systems and Tools</b>	Linux/UNIX; Vim, Emacs; CMake, GDB, Valgrind; Git, SVN; MongoDB, Redis.
